

KEYYASK PROJECT - January 2015 to June 2015

Overburden and rock was removed from the future location of the Keeyask powerhouse to prepare for first concrete.

Construction milestones:

- Construction begins for the South Access Road.
- Construction starts on the spillway cofferdam.
- Construction starts on the permanent concrete batch plant.
- Completion of Keeyask Cemetery - a site for the reburial of human remains found during the construction and operation of the Keeyask Project.
