

# KEYYASK PROJECT - June 2015 to January 2016

Progress continued on the South Access Road and infrastructure at site, with a focus on structures excavation. A small volume of concrete was placed for the service bay in the fall. Seasonal winter work includes excavation on the north dyke and reservoir clearing.

**Construction milestones:**

- Completion of main camp; contractor Britco leaves site.
- Service bay concrete placement begins before freeze up.
- Spillway cofferdam is completed.
- Excavation starts on the spillway.
