

KEEYASK PROJECT - January 2016 to June 2016

Focus has shifted to permanent earthworks (dams and dykes) and to concrete for the principle structures. The 2016 construction season was the first peak year of construction at Keeyask.

Construction milestones:

- North Dyke construction start – January 2016
- Spillway concrete start – April 2016
- North Dam construction start – May 2016
- Central Dam construction start – May 2016
- Powerhouse concrete start – May 2016
- KR1 transmission line (back-up power) brought into service – June 2016
- 250,000 trees planted in North Access Road borrow pits – June 2016
