1 OVERVIEW

Manitoba Hydro’s priority is health and safety. This COVID-19 Guideline (Guideline) outlines worker requirements for the use of masks while in indoor common areas within the Keeyask project boundaries. This is in addition to the currently existing protocols of wearing masks during transportation to and from site.

2 PURPOSE

Manitoba Hydro is committed to providing a safe and healthy work environment during a pandemic through proper planning and preparedness measures for the prevention and control of exposure to pathogens including COVID-19. The purpose of this Guideline is to implement and support practices to mitigate the risk of contracting COVID-19 while in indoor common areas within Keeyask Generation Project Site and have not already been communicated in previous contractor and worker guidelines.

This content supplements existing provincial resources, fact sheets and other information taken from either the Province of Manitoba or Canada.ca, which will be referenced.

3 POLICY

Masks must be worn in all indoor common spaces.

All workers and visitors to the project site must wear a mask of appropriate quality as outlined in section 7 of this guideline, as well as wearing the mask in the appropriate method as outlined in section 8 of this guideline.

4 PROJECT INDOOR COMMON SPACES

Indoor common spaces within the project area will include, but not be limited to:

• Camp reception area	• Camp Wellness Centre**
• Camp artic corridor	• ERS gathering room
• Camp meeting rooms	• EMS and Medical Services
• Camp dining area *	• Camp Lounge ***
• Camp ‘grab and go’	• Camp smoking areas ****
• Camp recreation facilities (not including Wellness Centre)	• Contractor public facilities (ie/ lunchroom)
• Camp theatres	• Keeyask Generating Station

*masks must be worn in the dining area during lineup, however once seated, the mask can be removed

** masks must be worn in the Wellness Centre throughout the facility up to the point where the exercise routine begins (i.e./the beginning of use of weights or cardiovascular exercise/track, etc.), and will be put back on once the workout is complete

***masks must be worn in the lounge throughout the facility up to the point a guest becomes seated at which point the mask can be removed, assuming social distance can be maintained

***masks must be worn in any smoking area throughout the facility up to the point a guest enters the smoking area and a cigarette is lit. Once the cigarette is extinguished, it is expected the mask will be put back on if social distancing cannot be maintained

5 DEFINITIONS

Physical Distancing/Social Distancing

Limiting the number of people that you, and your co-workers, come into close contact (within two metres/ six feet).

6 RESPONSIBILITIES

6.1 MANITOBA HYDRO IS RESPONSIBLE FOR:

- Creating the guideline;
- Communicating and instructing MH staff and contractors on the guidelines;
- Providing necessary information and tools to MH staff contractors for effective roll out;
- Providing a public information campaign to support the implementation; and
- Ensuring applicable masks are available for workers who do not have appropriate masks.

6.2 CONTRACTORS ARE RESPONSIBLE FOR:

Contractors are responsible to adhere to and to follow guidelines within this document. This includes communicating to workers all information related to the use of masks in indoor common spaces.

6.3 WORKERS ARE RESPONSIBLE FOR:

Ensuring they use an appropriate quality of mask, use it in the applicable locations, and wear it correctly.

6.4 SECURITY SERVICES ARE RESPONSIBLE FOR:

To educate and require workers to maintain compliance with this guideline if and where applicable.

7 TYPE / QUALITY OF MASKS

When worn properly, a person wearing a non-medical mask or face covering can reduce the spread of his or her own infectious respiratory droplets.

Non-medical face masks or face coverings shall:

- Allow for easy breathing;
- Fit securely to the head with ties or ear loops;
- Maintain their shape after washing and drying;
- Be changed as soon as possible if damp or dirty;
- Be comfortable and not require frequent adjustment;
- Be made of at least 2 layers of tightly woven material fabric (such as cotton or linen);
Neck gaiters and multi-scarves are not allowed to be used as masks
- Be large enough to completely and comfortably cover the nose and mouth without gaping; and
- Masks with filters are acceptable. Some masks also include a pocket to accommodate a filter, for example; paper towel or disposable coffee filter, for increased benefit.

Face masks with breathing valves are not allowed to be worn unless they are required respiratory protection for the task being performed. The most important aspect about face masks is ensuring they are worn appropriately (covering nose and mouth) and are not being touched while wearing or they will not be effective.

8 PROPER METHOD OF MASK USAGE

A mask can reduce the chance that others are coming into contact with your respiratory droplets, in the same way as practicing cough etiquette by covering your mouth and nose with a tissue when coughing or sneezing or coughing or sneezing into your sleeve.

Employees must wear an approved mask in indoor common spaces. Approved masks can be of either the medical or non-medical type and must cover the wearer's mouth and nose to prevent respiratory droplets from spreading to others or landing on surfaces.

The following are recommended practices to follow with mask usage:

- Wash your hands immediately before putting it on and immediately after taking it off;
- Practice good hand hygiene while wearing the mask;
- Ensure your mask fits well (doesn't gape);

243954-0120-XXXXXX-PLAN- Mask Usage in Indoor Common Spaces – KCR04	1	6

- Do not share your mask with others; and
- Avoid touching the front of the mask or changing a mask multiple times in a shift unless it is damaged, damp or visibly soiled.

Face masks can become contaminated on the outside, or when touched by your hands. Avoid touching your face mask while wearing it and change your mask as soon as it is damp or soiled. To clean non-medical mask directly into a bag or into the washing machine, launder your mask on a hot cycle and dry it thoroughly. For information about the safe use of non-medical masks, visit Health Canada.

For information about the safe use of non-medical masks, visit [Health Canada](https://www.healthcanada.ca).
